THE RALEIGH FACTORY • IN • 1894.

For Raleigh's founder Frank Bowden, the bicycle was far more than the cornerstone of his business, it literally helped to save his life. Bowden, a successful lawyer by trade, became seriously ill while living in the Orient. He was told by doctors that he had less than a year to live. He began cycling in an effort to improve his condition and after several months of riding he had regained his full health and vigor. He was so inspired by this life changing experience that in 1887 he purchased an interest in the small shop on Raleigh Street in Nottingham England where his bicycle was made. The rest, as they say, is cycling history. In a few short years Bowden had expanded the Raleigh Company into a five story factory, producing a wide range of models to appeal to every sector of the expanding bicycle marketplace.

By **1892** Raleigh bicycles had amassed an astounding number of racing successes, winning over 2300 prizes worldwide. American A.A. Zimmerman took spectacular wins on his innovative Raleigh bicycles and became the bicycling Champion of the World.

In **1902** Raleigh became the first to produce the now legendary Sturmey-Archer gears and incorporated them into its model line.

By the **1920s**, Raleigh was one of the largest bicycle factories in the world.
In **1923** Raleigh introduced the first lugless framed racing bicycle.

Despite the economic downturn of the Great Depression, Raleigh Bicycles continued to expand and flourish, introducing its lightweight bicycles to America in **1933**. The sleek new Raleighs were an instant success.

After WWII, Raleigh expanded its operations worldwide and continued to lead the industry with new designs and innovations. The performances of Reg Harris, five times World Champion Sprinter and Olympic Silver Medalist in the **1940's** set many track records and further added to Raleigh's racing accolades.

During the early **1950's** Raleigh continued to use the technology developed by its racing programs to bring cycling pleasure to the masses. Lightweight roadster models and drop bar bikes were introduced.

In **1960** Raleigh stopped making lightweight cycles at the Nottingham facility and bought Carlton Cycles, a respected hand-built racing cycle specialty manufacturer based in the nearby town of Worksop. The increasing use of automobiles in the early **1960's** meant the declining use of roadster bikes, and led Raleigh to design more innovative models for adults.

Raleigh Road Bikes, The Tradition Continues.

In the early **1970's** there was a great resurgence in cycling that centered around the lightweight 10-speed racing bicycles of the day. Raleigh enjoyed great success during this period with its Record and Grand Prix models which were based on the Carlton lightweight design. Raleigh also backed European-based road-racing teams through the late **1970's** and early **1980's**. A crowning achievement was the overall victory in the Tour de France by Joop Zoetemelk while riding for TI-Raleigh Creda in **1980**.

In **1983** Raleigh made the decision to sponsor the United States National Cycling Team with advanced aerodynamic bicycles designed in a new technical center built specifically for that purpose. Raleigh Cycle Company of America's patented Technium process of thermal bonding of dissimilar materials helped the U.S. Team win 3 gold medals, one silver medal and one bronze medal at the **1984** Olympics in Los Angeles.

During the **1980's**, road bike sales had flattened out and the mountain bike boom had officially begun. Road racing at the time offered insufficient exposure to warrant continued investment of major sponsorship dollars. The luster that had existed in the road racing heyday of the **70's** had faded. Mountain Bike racing was fresh and exciting, a sport for the masses, and in **1989** Raleigh UK organized its first MTB racing team.

Raleigh America joined the mountain bike wars by signing John Tomac, a veteran of the 7-11 and Motorola road teams and former National Champion in BMX, road and mountain biking. To the delight of his followers and the dismay of his rivals, "Johnny T" dominated MTB racing during the nineties in both cross country and downhill disciplines.

Raleigh renewed its involvement in race team sponsorship in **2003** by signing an agreement with Team Biogen-Idec, a team of professional riders based in Salt Lake City, Utah. Through this and other team affiliations, Raleigh riders reached the podium in numerous races in **2004**. Among the victories posted were Junior National and Masters World Championship titles.

With the addition of the C6 Fusion and C6 ACE frames, the **2005** line of Raleigh bicycles is the most technologically advanced in the company's 117 year history. Advanced carbon composites and state of the art manufacturing techniques have yielded bicycles that are lightweight, efficient and comfortable.

Today, it's another time and another place but we still remain true to our roots, building innovative, high quality bikes with an eye on value. Life will always have its ups and downs. Riding a Raleigh can make it better. We design and build bicycles that will carry you through life's adventures whether it's around the block or miles from home.

So get outside and go for a ride. We'll meet you there.

The C6 A.C.E. (Advanced Carbon Engineering)
Full C6 carbon fiber composite

C6 carbon fiber composite tubes manufactured with function specific lay-up and shape design to maximize performance and minimize weight.

C6 carbon fiber composite structural components and aluminum fittings.

Co-Molded with internal and external joint reinforcement for added structural rigidity.

C6 TECHNOLOGY

Advanced materials and design - optimized performance and comfort!

Utilizing the latest developments in materials technology and manufacturing engineering the Raleigh C6 Project Team has created frames that are simultaneously light but strong, stiff but compliant, highly functional yet beautiful to look at.

How did they do that?

With a lot of hard work, that's how. The result is the C6 frame series, a combination of the latest in aluminum alloys, carbon fiber composites, innovative designs and over 117 years of experience in building the highest quality, best riding bicycles in the world.

The C6 FT (Fusion Technology)
C6 carbon fiber composite/7000 series aluminum alloy

Six C6 carbon fiber composite tubes manufactured with function specific lay-up and shape design to maximize performance and minimize weight.

CAD designed 7000 series aluminum alloy structural components and fittings machined and finished for a precision fit.

Advanced thermal catalyst bonding technologies that create a joint with superior strength and durability.

Raleigh: Team

Built around the new C6 A.C.E. full carbon frame, the Raleigh Team has what it takes to satisfy the most demanding riders. A perfect blend of performance and comfort, the Team features a 10-speed Shimano DuraAce group for unrivaled shifting and braking performance, while a Mavic Ksyrium SSC SL wheelset delivers power to the pavement. A Ritchey WCS Carbon handlebar and seatpost connect you to this black beauty.

Raleigh: RAM XT 3500

After turning heads in lift lines and on trails last year, the RAM XT 3500 has been refined for 2005 with improved geometry, increased travel, a 1.5 inch compatible head tube and one piece forged dropouts for added stiffness and durability. The 6-7 inch adjustable travel frame is equipped with a Manitou Swinger 6-Way shock and Sherman Slider Plus fork. Hayes El Camino brakes and AtomLab Trailpimp wheels will keep it together through the toughest conditions you can find.

Raleigh: RAM XT 2500

For the single crown set, the 2005 RAM XT2500 is a force to be reckoned with. This 6-7 inch travel model gives you the added versatility of a Manitou Sherman Flick Plus fork, with 110-150mm of SPV damped travel up front. Choice components include a Truvativ Holzfeller crankset and stem, Hayes HFX 9 disc brakes and Kenda Nevegal 2.5 inch tires.

Raleigh: Phase II

The Raleigh Phase II is the perfect tool for whipping your workweek stress into submission. A double-buttressed RAM 4-Bar frame with 4 or 5 inches of adjustable, SPV damped travel provides the backbone for this great all mountain machine. The list of top-drawer parts is almost too long to print but we'll give you a teaser: Manitou Minute 3:00 fork with Infinite Travel Adjust, Truvativ Stylo Team GXP crank/BB with external bearings and Avid Juicy 7 hydraulic disc brakes.

Raleigh: SC200 DX

The best thing about a Raleigh Comfort bike is what it doesn't do. It doesn't complicate your riding experience. With an Atomic 13 butted aluminum frame, rack and fender mounts and Hayes HMX-2 disc brakes, the Raleigh SC200DX provides reliable all weather performance in a stress free package. Other comfort enhancing features include an Avenir web-sprung saddle, Avenir 2-Density grips and an SR Suspension fork.

Raleigh: SC40

The Raleigh SC40 rides just right, kind of like a conversation with an old friend—everything you need without frills. With its Atomic 13 aluminum frame and 24-speed Shimano MegaRange drivetrain with Revo shifters, the SC40 is there for you whenever you need it. An SR CR870 suspension fork and Avenir Comfort sprung saddle smooth out life's little speedbumps and keep you gliding along.

Raleigh: C700

We've blended the most desirable traits of our high performance road bikes and our popular cross models and come up a flat bar road bike that's more than the sum of its parts. The Raleigh C700 is aggressive in nature but it has a relaxed, heads-up riding position that increases comfort and inspires confidence. An Atomic 13 R aluminum double-buttressed frame is equipped with a carbon fiber fork to decrease weight and further improve the ride. Vittoria Randonneur 700x28c tires with puncture protection provide an added measure of speed and safety.

Raleigh: C200

The idea behind the Raleigh C200 is to provide speed and efficiency with a bias towards comfort. To this end we've taken an Atomic 13 SL butted aluminum comfort frame and added an SR suspension fork, 24-speed Shimano drivetrain, Hayes HMX-2 mechanical disc brakes and Avenir Comfort saddle, grips, and pedals.

Raleigh: C40

Taking in the fresh air & sunshine on a Raleigh C40 is a great way to leave your troubles behind. This bike is designed to let you cruise away your cares in style and comfort. The lightweight Atomic 13 aluminum frame and the 24-speed Shimano MegaRange gearing won't let any pesky hills spoil your fun. An SR suspension fork and full array of Avenir Comfort components will help keep that smile firmly in place.

Raleigh: Coupe

The Raleigh Coupe tandem was the recipient of an extreme makeover this season, creating an exciting new flat bar road tandem for 2005. This bike is all about combining speed and comfort, using an Atomic 13 aluminum tandem frame equipped with tandem specific 700c wheels and Avid BB7 disc brakes. A Truvativ Elita ISIS drive tandem crankset keeps the two of you in synch while Shimano drivetrain components handle the shifting duties. The new Coupe is flat out fast and fun.

Framesets

Built From Tradition, Crafted with Precision.

Team Road

This is the C6 ACE (Advanced Carbon Engineering) full carbon fiber composite frame that is featured on our flagship Team road bike. C6 carbon fiber tubes are designed with function specific lay up and shape to maximize performance and comfort and minimize weight. Frames are co-molded with internal and external joint reinforcement to added durability and rigidity.

Available in 50cm, 53cm, 55cm, 57cm, 59cm, and 62cm sizes in Satin Carbon finish.

Inferno

Looking for a race ready full suspension rig that can climb like a scared cat and smooth out the roughest descent? The new improved 2005 Raleigh Inferno provides solid performance for epic XC rides or a trip to the local training race. Made of butted Atomic 13 SL Series tubing and equipped with a Fox Float RP3 shock with Pro Pedal damping, the Inferno delivers 3 of highly efficient travel. Disc or V-brake compatible.

Available in small, medium, and large sizes in Raleigh Red Gloss finish.

Prestige Road

The C6 FT (Fusion Technology) Prestige frame features six C6 carbon fiber tubes mated to a double butted Atomic 13 SL seat tube/bottom bracket assembly. Advanced thermal catalyst bonding techniques are used to maximize durability and create a frame that delivers a perfect balance of light weight, stiffness and comfort.

Available in 50cm, 53cm, 55cm, 57cm, 59cm, and 62cm sizes in Union White/Carbon Satin finish.

Team Cross

The 2005 Team Cross is a combination of classic Euro cyclocross style and high technology. Kinesium butted tubes mated to carbon fiber seatstays and a carbon cross fork produce a lightweight frame that delivers an efficient yet comfortable ride. Rack and fender mounts provide flexibility for use as a commuter or touring bike.

Available in 50cm, 52cm, 54cm, 56cm, and 58cm sizes in Raleigh Red Gloss finish.

Team Talus Hardtail

This is the frame ridden by Team Biogen-Idec professional riders on the NORBA circuit, including winning the Masters World Championship XC race in late 2004! A double butted Kinesium frame provides a lively yet stable platform. Frame weight is approximately 3 pounds on this race ready beauty. Add components of your choice and you're ready to take on all comers. Disc or V-brake compatible.

Available in small, medium, and large sizes in Raleigh Red Gloss finish.

Raleigh bicycles are distributed by Raleigh America, Inc.

Raleigh America, Inc. Bicycle Limited Warranty

It is the owner's responsibility to thoroughly read and understand the owner's manual and regularly examine the product to determine the need for professional, authorized service or replacement. Please consult an authorized Raleigh America, Inc. bicycle dealership with any questions on use and maintenance. Regardless of the length of the warranty, Raleigh America, Inc. does not imply that the bicycle will last forever or cannot be broken. A worn out bicycle does not indicate it is warrantable.

Raleigh America, Inc. warrants this new Raleigh America, Inc. bicycle against defects in material and workmanship as follows:

<i>Item</i>	<i>Warranty Term Length</i>
Steel bicycle frames with wheel size less than 26"	For as long as the original retail purchaser owns the bicycle
Steel frames with 26" and 700c wheels, Aluminum, Full Suspension bicycle frames	Five years from the date of original retail purchase
Full Carbon Fiber Road frames	Five years from the date of original retail purchase
Carbon/Alloy Road frames	Five years from the date of original retail purchase
Forks, Non-branded	Five years from the date of original retail purchase
Forks, Branded	Covered under the fork manufacturer's warranty. Consult dealer for details.
Components, Non-branded	One year from the date of original retail purchase
Components, Branded	Covered under the component manufacturer's warranty. Consult dealer for details.
Finish, decals, suspension bolts, pivot parts, bushings, and bearings	One year from the date of original retail purchase
Labor, frame replacement	One year from the date of original retail purchase
Labor, parts replacement	Thirty days from the date of original retail purchase

1. This warranty only applies to the original retail purchaser and is not transferable.
2. Specific model exceptions to this warranty are noted with the bicycle documentation.
3. Raleigh America, Inc.'s sole obligation under this warranty is, at Raleigh America, Inc.'s option, to repair the product or replace the product with a current item.

To obtain service under this warranty, you must:

1. Return your fully assembled Raleigh America, Inc. bicycle to an authorized Raleigh America, Inc. bicycle dealer within the United States of America. A bicycle that has had the components removed can not be evaluated or warranted.
2. Provide proof of purchase, including but not limited to the retail bill of sale, your credit or debit card receipt, or other satisfactory proof of the date of purchase.
3. The proof of purchase must indicate the bicycle was sold fully assembled and adjusted by an authorized Raleigh America, Inc. dealer within the United States of America. Sales where the bicycle was delivered in a carton to the end user (e.g. mail order or Internet sales) void the warranty.

This warranty does not apply to damage or failure due to:

1. Accidents, alteration, abuse, neglect.
2. Materials fatigue, normal wear and tear.
3. Improper assembly, maintenance, or installation of parts or accessories not originally intended to be compatible with the bicycle as sold, including but not limited to power assist accessories, forks, brakes, or tires different from original specification.

This warranty also excludes:

1. Commercial use, racing or competition, stunting and jumping, lack of technical skill, competence, or experience of the user.
2. Bicycle frames, which have been repaired (e.g. welded or bonded), repainted, or had the original decals removed.
3. Frames, forks, wheels, axles, handlebars, and stems, which are bent from just riding along, can be a sign of misuse or abuse and are not covered under this warranty.
4. Personal transportation costs or product freight costs to or from an authorized Raleigh America, Inc. bicycle dealer.

Photography: Earl Harper Studios

Warranty replacement frames must be fully assembled by an authorized dealer to maintain the warranty coverage. The warranty for the replacement frame shall be the warranty offered for the equivalent bicycle's frame of that model year. If not assembled by the dealer, replacement frames are considered aftermarket frames. After market frames are only warranted for one year from the date of purchase for the original purchaser. This one-year warranty excludes any issues that can be traced to assembly or component incompatibility.

This warranty is expressly in lieu of all other warranties, and any implied warranties of merchantability or fitness for a particular purpose created hereby, are limited to the same duration as the express warranty herein. Raleigh America, Inc. shall not be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitations of implied warranties, incidental or consequential, so the above limitations and exclusions may not apply to you. Retailers and wholesale outlets for Raleigh America, Inc. products are not authorized to modify this warranty in any way. This warranty gives the original owner specific legal rights. Other additional rights may vary from state to state.

Raleigh America Inc., 6004 S. 190th Street, Suite 101, Kent, WA 98032

Part No. 96-05-500

Authorized Raleigh Dealer:

All Raleigh bicycles meet or exceed CPSC standards. Complete equipment is included with each Raleigh bicycle but not necessarily shown in photographs, e.g. reflectors. All Raleigh bicycles are covered under warranty. See your authorized Raleigh dealer for complete details. Raleigh specifications are subject to change without prior notice. Raleigh is a registered trademark of the Raleigh America, Inc. © 2004, Raleigh Bicycles. All rights reserved. WARNING: All riders depicted in this catalog are professionals. Do not attempt to duplicate any actions that are beyond your abilities. ALWAYS WEAR A HELMET!
